

Control snacks are available exclusively through physician managed weight loss centers and centers managed by healthcare professionals. The slow-carb snacks are clinically proven to control hunger and reduce calorie consumption at your next meal up to 21%.

The Control snacks program is designed to be flexible and tailored around you! Control snacks can be used **2-3 times a day** to help prevent sugar and carb cravings and reduce your overall calorie consumption.

For optimum results use Control snacks in conjunction with a well balanced weight-loss or weight maintenance plan.

Available in Bars, Crisps, Shakes and Drizzles.
